About Me

CRTP Certified, Web Application Penetration Tester, self-taught Full Stack Web Developer and very passionate about everything related to Cyber Security. A CTF player on HackTheBox and TryHackMe. Pursuing CEH and Malware Development next.

Technical Skills

Languages	:	JavaScript, Python, Bash, SQL, HTML, XML, NoSQL, C++, Kotlin, CSS
Frameworks	:	ExpressJS, Django, React, Bootstrap, Mongoose
Tools	:	Linux, BurpSuite, Claude Code, Nmap, Nessus, Hydra, Podman, Git, MySQL, AI Automation

Experience

Senior Security Consultant II May 2025 – Present
Ernst & Young Global Delivery Services (EY GDS) *Hybrid*

- Delivered 200+ full-scope penetration tests across major enterprise apps, AI/LLMs, and core infrastructure.
- Uncovered critical RCE, LFI, PrivEsc and source code disclosures.
- Built shift-left CDAST Burp automation with Claude code agents alongside Copilot for operational workflow automation; also actively upskilling via EY advanced training.
- Earned multiple client commendations for discovering high-impact flaws and delivering actionable reports.

Information Security Analyst May 2024 – May 2025
ISOAH Data Securities Pvt. Ltd. *On-Site*

- Conducted web pentests across client applications and achieved the top score in the CERT-In practical skill examination, securing the firm's CERT-In Empanelled Auditor accreditation.
- Reviewed source code to eliminate bugs hidden from a Black-Box approach.
- Audited 100+ network endpoints and servers to eliminate exploitable security misconfigurations.

Team Lead, API Technical-Integration May 2023 – May 2024
Walmart, RiseOTB *Remote*

- Debugged enterprise REST APIs, resolving authentication, authorization, and networking issues.
- Guided partner engineering teams on secure API integration architectures across marketplace endpoints.

Education

B.E. Computer Science Engineering – Chandigarh University Aug 2018 – Jan 2023

Certifications

Certified Red Team Professional (CRTP) – Altered Security Oct 2024

Projects

ThreatScope-Skill
Claude Code, Anthropic API, Recon Automation, Threat Modeling

- Created a Claude Code skill parsing scoping transcripts to correlate tech stacks with CVEs and HackTricks research.
- Automated research output into Word docs, with a companion recon skill to launch app scans.

LevelUp
JavaScript, React, Progressive Web App (PWA), Local Storage

- Engineered an offline-first, gamified habit tracker PWA inspired by Solo Leveling progression mechanics.
- Implemented service-worker caching, local data persistence, and interactive real-time daily quests.

Web-Hacking-Tools
Docker, Bash, Ubuntu

- Built containerized offensive images pre-configured with essential web pentest tools.
- Optimized cross-platform deployment for fast, consistent CLI tooling environments.

AutoJoin-Zoom
Python, PyAutoGUI, CSV

- A bot to automatically join classes on Zoom app. Needs timetables, meeting id's and passwords in a csv file.
- Works for both Linux and Windows. Motivated by endless online classes.

MyCampSite
Node.js, Express, MongoDB, Mapbox API

- Built a full-stack platform featuring authentication, role access control, and review feeds.
- Integrated Mapbox web APIs for dynamic location mapping.
